

John 14:14
P75: Has it "me"?

NA²⁷ John 14:14 εἰάν τι αἰτήσητέ με ἐν τῷ ὀνόματί μου ἐγὼ ποιήσω.

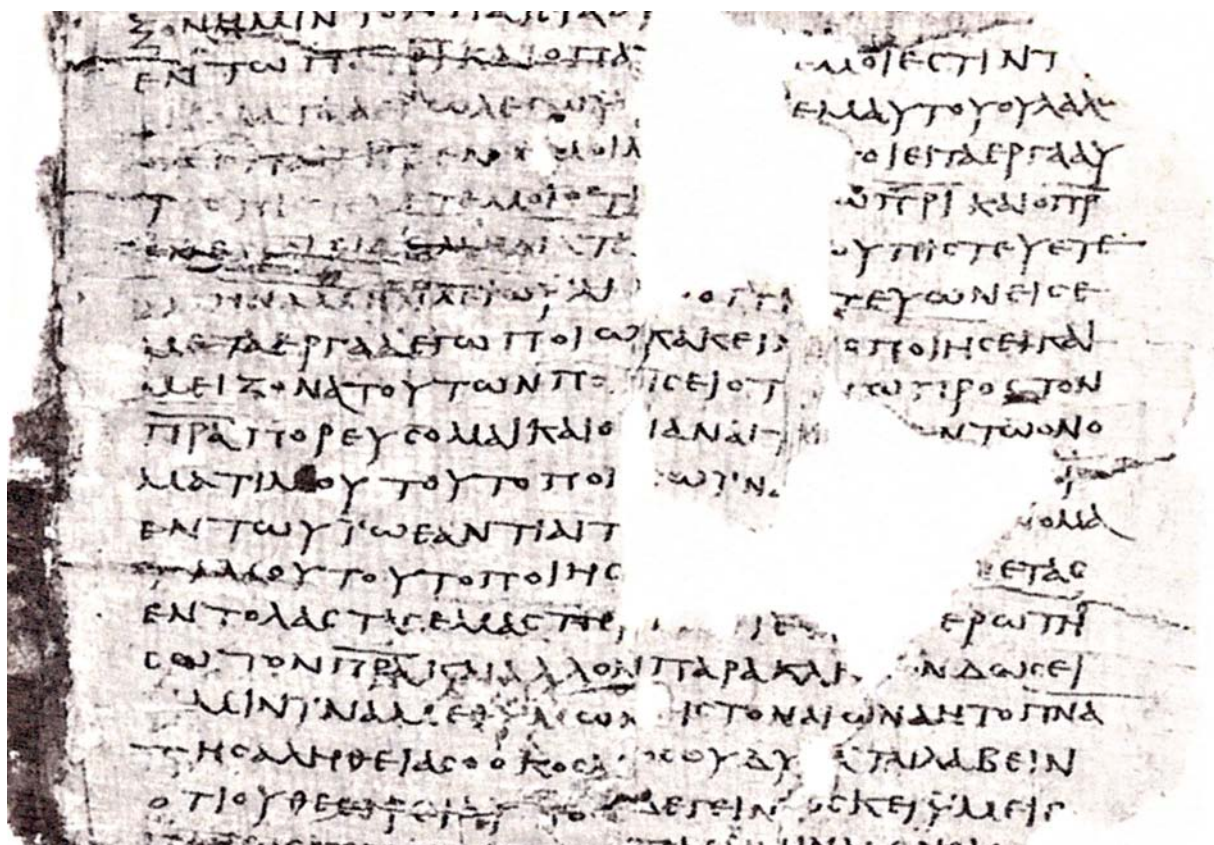

omit: A, D, K, Π, L, Q, Ψ, 69, 157, 1071, 1241, 1424,
Maj-part[G, M, Y, Λ^{mg}], it(a, aur, b, d, e, q, r¹), vg^{mss}, Co

txt P66, 01, B, W, Θ, 060, 0211, f13, 2, 28, 33, 579, 700,
Maj-part[E, H, U, Γ, Δ, Ω], c, f, (ff²), vg, Sy

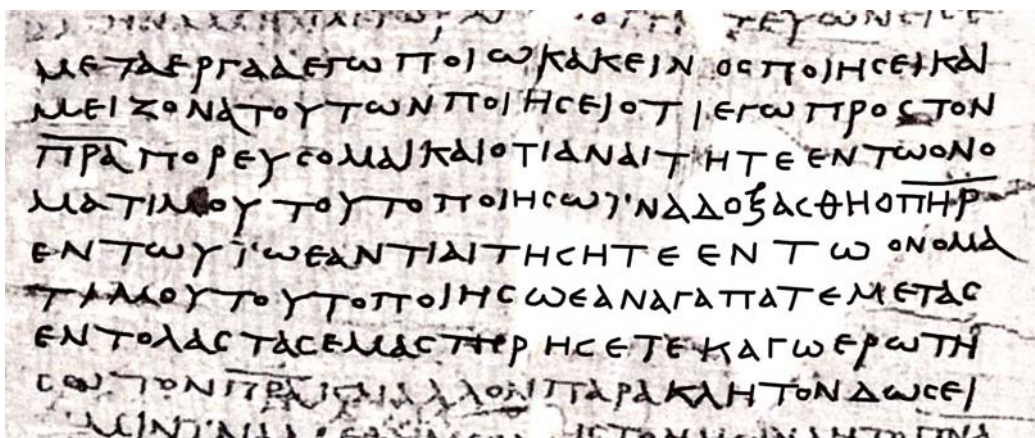

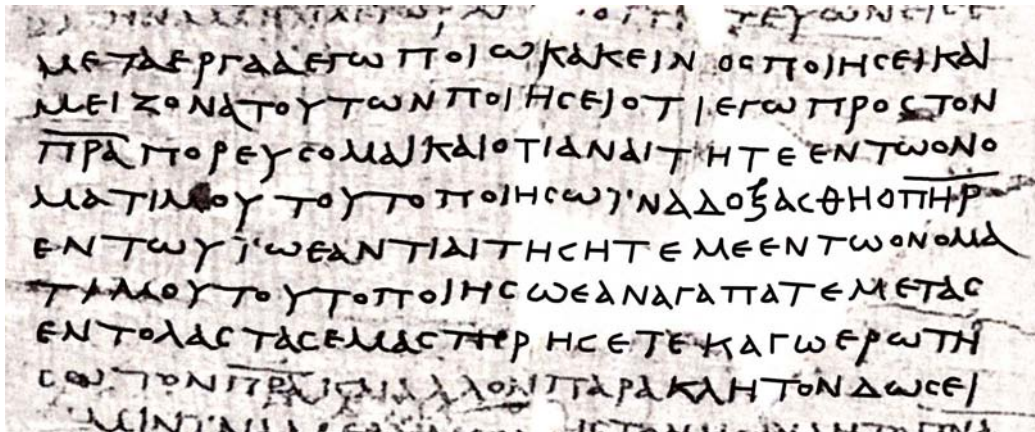

P75 has a relatively large lacuna here.

UBS¹⁻³ do not list P75. UBS⁴ is listing it as "vid" for txt, though.

The manuscript at this position looks like this:

Below are two reconstructions with and without με:

The lacuna is relatively large and με is not a long word, but it seems that the reading with με is fitting the space better.

I'm not sure though if this already justifies a "vid".

Bill Warren writes (tc list, 2010):

"I would say that both decisions are defensible--including ME as a "vid" or listing this as lacunose in the ms. We opted to list it as lacunose in our apparatus at the CNTTS, but we do show the text in the baseline entry (our "L" entry for listing all lacunose MSS for each verse) with the lacunose part noted in normal way with brackets versus the visible text of the MS."

Perhaps a vid" with question mark is in order?
