

The photo given in Lakmann's article is illegible. Only an ΟΥ (from του) can be seen.

Overall one can conclude from the above evidence that P75 omitted one of these three names: τοῦ Ἐβερ, τοῦ Σαλὰ or τοῦ Καϊνάμ.

Since all of these names are within a lacuna, it is impossible to decide which name had been omitted. The assumption that the omitted name is Καϊνάμ seems to be based on the fact that this name is omitted by D; but there is no guarantee (indeed there is no particular reason to assume) that P75 omitted the same word as D.
